Signature and date, Head of Department (equivalent)*:	Clarification of signature, Head of Department (equivalent)*:
Title Head of Department (equivalent)*	

The Swedish Radiation Safety Authority is the personal data controller for the processing of personal data you provide in the application. You can read more about this and your rights on our website, see: <https://www.stralsakerhetsmyndigheten.se/en/processing-of-personal-data-by-the-swedish-radiation-safety-authority2/>. When you submit your application to the Swedish Radiation Safety Authority, it becomes a public document. Decisions on awarded grants are posted on the Radiation Safety Authority's website.

The Swedish Radiation Safety Authority transfers information about awarded grants to the Swedish Research Council for publication in SweCRIS, a national database of grant-funded research set up on behalf of the government (www.swecris.se). Publication takes place to publicise and communicate Swedish research, as well as to enable aggregated statistical analyses. The transferred information includes details about the call, data from the project application and participating researchers, as well as information about decisions made regarding the application, such as the funding period and granted amount. Please note, however, that personal identity number and contact details will not be shown publicly. The information may be transferred from SweCRIS to the university that is the grant manager for the specific funding.

Those who are registered in SweCRIS have the right to request a register extract in order to check what information is registered about them. The Swedish Research Council is the personal data controller for handling data within SweCRIS and is obliged to correct incorrect data upon request from those who are registered. Contact swecris@forskning.se if you want to know more.
